Features

Extreme Performance

Ultra low thermal resistance and superior heat conductance maintain the highest performance level of heat transfer between the heat source and heatsink for maximized cooling performance.

Convenient Application and Storage

The syringe applicator provides convenience during storage and application on a variety of computer components such as the CPU, GPU, and Northbridge chipset.

High Safety Standards

The composition is dielectric (electrically nonconducting) to prevent electrical hazards and complies with the RoHS (Restriction of Hazardous Substances) standards for the highest level of safety.

Specifications

Specifications:

Color	Gray
Capacity	3.5g
Specific Gravity @23°C	2.88
Thermal Resistance	8mm ² · K/W
Thermal Conductivity	4.1W/mK
Temperature Stability	-40°C ~ +150°C (-40°F ~ +302°F)

Cautionary Notes:

Please keep the syringe cap tightly closed during the storage.

Use only as thermal grease. Keep out of the reach of children.

Avoid contact with skin and eyes.

Do not ingest or put into mouth. If ingested, get medical attention.
